EDUCATION

Clemson University

B.S. in Computer Science, Minor in Business Administration

Aug. 2023 – Dec. 2026

GPA: 3.47/4.00

EXPERIENCE

AWS Cloud Engineer (Capstone)

Axio LLC – Clemson School of Computing Capstone

Aug. 2026 – Present

Clemson, SC

- Building a chain-of-custody mission control platform to monitor and log autonomous medical drone delivery missions
- Designing a serverless AWS backend with API Gateway, Lambda, and RDS, secured with Cognito authentication
- Collaborating with a cross-disciplinary team of engineers, pilots, and developers to deliver sponsor milestones
- **Technologies:** React, AWS (S3, Lambda, RDS, Cognito, API Gateway), SQL, GitHub

Full-Stack Web Development Intern

American Credit Acceptance

Jun. 2026 – Aug. 2026

Spartanburg, SC

- Built a full-stack React platform that automated business users' manual paper template management into one central system, saving an estimated \$65K per year
- Implemented secure authentication and role-based access controls, and deployed the SQL-backed app on AWS with GitHub Actions CI/CD
- **Technologies:** React, AWS (S3, Lambda, RDS, Cognito), SQL, GitHub Actions

Baseball Analytics Intern

Clemson Baseball – Clemson University

Jan. 2026 – May 2026

Clemson, SC

- Developed a coach-facing prospect comparison tool that benchmarks current roster players against future prospects on key stats and KPIs, replacing manual player-by-player lookups
- Built and maintained data pipelines for player tracking and game performance analytics
- **Technologies:** Python, Pandas, SQL, Streamlit

Front-End Developer Intern

9x9 Project – Clemson University

Jan. 2025 – Dec. 2025

Clemson, SC

- Developed and maintained a responsive web platform for interactive puzzle-solving and user data management
- Collaborated with a small team to enhance UX, optimize data handling, and ensure cross-browser compatibility
- **Technologies:** HTML/CSS, JavaScript, PHP, MySQL, phpMyAdmin, Git/GitHub, Hostinger

PROJECTS

CFBowledge | liferouby.com/cfbowledge

Aug. 2026

- Architected a responsive React single-page application for a competitive college football fantasy game
- Engineered a JavaScript scoring engine to process weighted scoring and real-time standings for 8 users across 80 teams
- **Technologies:** React, React Router, Vite, JavaScript, CSS

StrikePhone | devpost.com/software/strikephone

Apr. 2025

- Built a React Native/Expo Go mobile app that automatically calls Wiffle Ball/Blitzball pitches as balls or strikes, winning Most Innovative Hack at CU Hackit 2025
- Tracked the ball with OpenCV Hough Circle detection and used AI pose estimation to map each batter's strike zone
- **Technologies:** JavaScript, React Native/Expo Go, OpenCV, AWS, Git/GitHub

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java, C/C++, HTML/CSS

Frameworks and Libraries: React, React Native, OpenCV, Streamlit, Pandas

Cloud and Databases: AWS (S3, Lambda, RDS, Cognito, API Gateway), MySQL

Developer Tools: Git, GitHub, GitHub Actions (CI/CD), VS Code, phpMyAdmin

AWARDS

2025 CU Hackit: Most Innovative Hack (StrikePhone)

2023–2026 South Carolina LIFE Scholarship

2022 VEX Robotics World Championship: VRC World Semifinalist
